ltruji@wpi.edu

Freelance Web Design

- Built multiple websites for clients including ones for personal and business purposes
- Prospected and negotiated with potential clients to close a deal

Diodeck

- Designed and developed an innovative e-learning platform for teaching STEM through hands-on learning

F.W. Webb

- Researched for missing product information and corrected incorrect data
- Wrote software in Java using Excel-based libraries to automatically reorder and sort existing product data which was previous done by hand at the company

Geek Squad

- Intermediate computer repair (both software and hardware)
- Provided excellent customer service with clear explanations and straightforward advice

Altiostar Network Inc.

- Using Java built software to automatically pull QoS (Quality of Service) records from the company's server
- Then parsed records into a human-readable form and created always-up-to-date charts using Javascript and PHP to show crucial QoS data in a presentable way
